Thanks for downloading VEEER! I hope VEEER will save you a lot of time with the management of windows. **Please note**, that by installing and using VEEER you agree to the license agreement and privacy policy.

To install VEEER, unzip the downloaded file and place the VEEER app inside your application folder. Open VEEER by double-clicking and go to *Settings & Privacy > Accessibility > Privacy* and place a checkmark to allow VEEER to control your windows (Click the lock beforehand). Once you have granted VEEER access, open VEEER again to see the welcome screen.

If you find a bug or experience an issue with using my software, join my VEEER facebook support group to send the details about your bug/issue and I'll work on solving that bug in future updates. When writing a bug/issue report please state your current operating system (e.g. macOS Sierra) and the problem you're experiencing.

If you find VEEER useful, consider sharing the link of the website so other designers & developers can find VEEER too.

If you are a designer, you'll probably like Myvinchy too.
